

MIDAS - Bond Opportunities B - Acc

Monthly summary report | as at 31 August 2019

Investment Objective

The fund seeks to achieve capital appreciation over the medium term by investing in a diversified portfolio of Euro-denominated fixed income securities (investment-grade corporate bonds, government bonds, high yield and emerging market debt as well as convertible bonds). The main focus is put on bottom-up selection. Interest rate as well as credit risks are managed actively.

Market Review

Global markets were rocked by the US-China trade war in August. A new round of tariffs imposed by the US President Trump and Chinese retaliation casted a shadow on economic growth outlook. Therefore, risky assets (corporate bonds, equities) tumbled and government bonds emerged as safe haven in the first half of the month. However, as discussions between US and China improved, risky assets bounced back in the second half of the month. Government yields remained low as central bank stood supportive.

During the month, the German 10Y yield dropped 26 bps to a new record-low of -0.70% and its US equivalent decreased further (-52 bps to 1.50%). Both curves flattened and the US 2-10 inverted for the first time since 2007. The Italian 10Y spread to Germany rallied 28 bps to 170 bps in the hope of a new government without fresh elections. Corporate bonds performed well. Investment grade bonds increased +0.69%, benefiting from the yield effect, and high yield ones returned +0.74%, as credit spreads tightened 14 bps. Hybrids and subordinated debt outperformed senior ones.

Portfolio Performance

The fund gained 0.75% in August. IG and HY bonds contributed similarly. Top contributors were Altice Europe, Dometic, Vodafone (hybrid), Diamond, Eurofins (hybrid), Walnut and Alimentation Couche-Tard. Worst contributors were Almaviva, Promontoria, Norican and Schaeffler.

Market Outlook

We maintained a balanced approach with a mix of IG and HY corporate bonds. As initiated in July, we slightly shifted towards HY names to enhance the fund's yield and we maintained moderate duration in IG as a hedge.

In the meantime, we implemented arbitrages to take advantage of relative value. In HY, we reduced Dometic and the iShares Euro HY ETF to take positions in Chemours, Ardagh and Casino. We also switched part of Bayer and Vodafone hybrids to reinforce Arountown one. We also reduced Italian government bonds in the recent rally.
